CAMERA STATUS LIGHT GUIDE

- Solid yellow light
The device is powered on and initializing
- Flashing yellow and blue lights
The device is ready for pairing
- Solid blue light
Pairing successful
- Red solid light
The device is connected
- Quickly flashing red light
Battery level is at 0%
- Flashing green light
The device is charging
- Solid green light
The battery is full
- No indicator light
The device is powered off or asleep

BATTERY STATUS LIGHT GUIDE

- One solid green light
The battery is charging
- Two solid green lights
The battery is fully charged

PRECAUTIONS

- Prevent direct sunlight from heating the inside of your camera past its maximum operating temperature of 122°F (50°C). Avoid direct sunlight where possible and only use your camera in environments within its operating temperature range: -4° to 122°F (-20° to 50°C).

- Do not connect the device to a power source via a USB-C port on your battery pack and connect it to a 5V/2A power adapter for 9 hours. This product is intended to be supplied by a UL Listed power adapter marked "Listed for Wyze Power Adapter" and rated at an output of 5Vdc, 2A minimum, Ima = 500mA minimum.

- If powered by a power adapter with ground pin, the adapter should be properly grounded.

CAUTION
This equipment is a point-to-point transmitter/receiver [i] that comply with Innovation, Science and Economic Development Canada's licence-exempt RSSs. Operation is subject to the following two conditions: (1) This device may not cause interference, and (2) This device must accept any interference, including interference that may cause undesired operation of the device.

- Replacement of a battery with an incorrect type that can cause a safeguard (for example, in the case of some lithium battery types).

- Do not drop, knock, fire or hot open, or mechanically crushing or cutting of a battery, that can result in an explosion.

- Use the device in an extremely high temperature surrounding environment that can result in an explosion or the leakage of flammable liquid or gas; and/or

- Replacement of a battery with an incorrect type that can cause a safeguard (for example, in the case of some lithium battery types).

- Do not drop, knock, fire or hot open, or mechanically crushing or cutting of a battery, that can result in an explosion.

- Use the device in an extremely low air pressure that may result in the leakage of flammable liquid or gas; and/or

- Replacement of a battery with an incorrect type that can cause a safeguard (for example, in the case of some lithium battery types).

- Do not drop, knock, fire or hot open, or mechanically crushing or cutting of a battery, that can result in an explosion.

- Use the device in an extremely high temperature surrounding environment that can result in an explosion or the leakage of flammable liquid or gas; and/or

- Replacement of a battery with an incorrect type that can cause a safeguard (for example, in the case of some lithium battery types).

- Do not drop, knock, fire or hot open, or mechanically crushing or cutting of a battery, that can result in an explosion.

- Use the device in an extremely high temperature surrounding environment that can result in an explosion or the leakage of flammable liquid or gas; and/or

- Replacement of a battery with an incorrect type that can cause a safeguard (for example, in the case of some lithium battery types).

- Do not drop, knock, fire or hot open, or mechanically crushing or cutting of a battery, that can result in an explosion.

- Use the device in an extremely high temperature surrounding environment that can result in an explosion or the leakage of flammable liquid or gas; and/or

- Replacement of a battery with an incorrect type that can cause a safeguard (for example, in the case of some lithium battery types).

- Do not drop, knock, fire or hot open, or mechanically crushing or cutting of a battery, that can result in an explosion.

- Use the device in an extremely high temperature surrounding environment that can result in an explosion or the leakage of flammable liquid or gas; and/or

- Replacement of a battery with an incorrect type that can cause a safeguard (for example, in the case of some lithium battery types).

- Do not drop, knock, fire or hot open, or mechanically crushing or cutting of a battery, that can result in an explosion.

- Use the device in an extremely high temperature surrounding environment that can result in an explosion or the leakage of flammable liquid or gas; and/or

- Replacement of a battery with an incorrect type that can cause a safeguard (for example, in the case of some lithium battery types).

- Do not drop, knock, fire or hot open, or mechanically crushing or cutting of a battery, that can result in an explosion.

- Use the device in an extremely high temperature surrounding environment that can result in an explosion or the leakage of flammable liquid or gas; and/or

- Replacement of a battery with an incorrect type that can cause a safeguard (for example, in the case of some lithium battery types).

- Do not drop, knock, fire or hot open, or mechanically crushing or cutting of a battery, that can result in an explosion.

- Use the device in an extremely high temperature surrounding environment that can result in an explosion or the leakage of flammable liquid or gas; and/or

- Replacement of a battery with an incorrect type that can cause a safeguard (for example, in the case of some lithium battery types).

- Do not drop, knock, fire or hot open, or mechanically crushing or cutting of a battery, that can result in an explosion.

- Use the device in an extremely high temperature surrounding environment that can result in an explosion or the leakage of flammable liquid or gas; and/or

- Replacement of a battery with an incorrect type that can cause a safeguard (for example, in the case of some lithium battery types).

- Do not drop, knock, fire or hot open, or mechanically crushing or cutting of a battery, that can result in an explosion.

- Use the device in an extremely high temperature surrounding environment that can result in an explosion or the leakage of flammable liquid or gas; and/or

- Replacement of a battery with an incorrect type that can cause a safeguard (for example, in the case of some lithium battery types).

- Do not drop, knock, fire or hot open, or mechanically crushing or cutting of a battery, that can result in an explosion.

- Use the device in an extremely high temperature surrounding environment that can result in an explosion or the leakage of flammable liquid or gas; and/or

- Replacement of a battery with an incorrect type that can cause a safeguard (for example, in the case of some lithium battery types).

- Do not drop, knock, fire or hot open, or mechanically crushing or cutting of a battery, that can result in an explosion.

- Use the device in an extremely high temperature surrounding environment that can result in an explosion or the leakage of flammable liquid or gas; and/or

- Replacement of a battery with an incorrect type that can cause a safeguard (for example, in the case of some lithium battery types).

- Do not drop, knock, fire or hot open, or mechanically crushing or cutting of a battery, that can result in an explosion.

- Use the device in an extremely high temperature surrounding environment that can result in an explosion or the leakage of flammable liquid or gas; and/or

- Replacement of a battery with an incorrect type that can cause a safeguard (for example, in the case of some lithium battery types).

- Do not drop, knock, fire or hot open, or mechanically crushing or cutting of a battery, that can result in an explosion.

- Use the device in an extremely high temperature surrounding environment that can result in an explosion or the leakage of flammable liquid or gas; and/or

- Replacement of a battery with an incorrect type that can cause a safeguard (for example, in the case of some lithium battery types).

- Do not drop, knock, fire or hot open, or mechanically crushing or cutting of a battery, that can result in an explosion.

- Use the device in an extremely high temperature surrounding environment that can result in an explosion or the leakage of flammable liquid or gas; and/or

- Replacement of a battery with an incorrect type that can cause a safeguard (for example, in the case of some lithium battery types).

- Do not drop, knock, fire or hot open, or mechanically crushing or cutting of a battery, that can result in an explosion.

- Use the device in an extremely high temperature surrounding environment that can result in an explosion or the leakage of flammable liquid or gas; and/or

- Replacement of a battery with an incorrect type that can cause a safeguard (for example, in the case of some lithium battery types).

- Do not drop, knock, fire or hot open, or mechanically crushing or cutting of a battery, that can result in an explosion.

- Use the device in an extremely high temperature surrounding environment that can result in an explosion or the leakage of flammable liquid or gas; and/or

- Replacement of a battery with an incorrect type that can cause a safeguard (for example, in the case of some lithium battery types).

- Do not drop, knock, fire or hot open, or mechanically crushing or cutting of a battery, that can result in an explosion.

- Use the device in an extremely high temperature surrounding environment that can result in an explosion or the leakage of flammable liquid or gas; and/or

- Replacement of a battery with an incorrect type that can cause a safeguard (for example, in the case of some lithium battery types).

- Do not drop, knock, fire or hot open, or mechanically crushing or cutting of a battery, that can result in an explosion.

- Use the device in an extremely high temperature surrounding environment that can result in an explosion or the leakage of flammable liquid or gas; and/or

- Replacement of a battery with an incorrect type that can cause a safeguard (for example, in the case of some lithium battery types).

- Do not drop, knock, fire or hot open, or mechanically crushing or cutting of a battery, that can result in an explosion.

- Use the device in an extremely high temperature surrounding environment that can result in an explosion or the leakage of flammable liquid or gas; and/or

- Replacement of a battery with an incorrect type that can cause a safeguard (for example, in the case of some lithium battery types).

- Do not drop, knock, fire or hot open, or mechanically crushing or cutting of a battery, that can result in an explosion.

- Use the device in an extremely high temperature surrounding environment that can result in an explosion or the leakage of flammable liquid or gas; and/or

- Replacement of a battery with an incorrect type that can cause a safeguard (for example, in the case of some lithium battery types).

- Do not drop, knock, fire or hot open, or mechanically crushing or cutting of a battery, that can result in an explosion.

- Use the device in an extremely high temperature surrounding environment that can result in an explosion or the leakage of flammable liquid or gas; and/or

- Replacement of a battery with an incorrect type that can cause a safeguard (for example, in the case of some lithium battery types).

- Do not drop, knock, fire or hot open, or mechanically crushing or cutting of a battery, that can result in an explosion.

- Use the device in an extremely high temperature surrounding environment that can result in an explosion or the leakage of flammable liquid or gas; and/or

- Replacement of a battery with an incorrect type that can cause a safeguard (for example, in the case of some lithium battery types).

- Do not drop, knock, fire or hot open, or mechanically crushing or cutting of a battery, that can result in an explosion.

- Use the device in an extremely high temperature surrounding environment that can result in an explosion or the leakage of flammable liquid or gas; and/or

- Replacement of a battery with an incorrect type that can cause a safeguard (for example, in the case of some lithium battery types).

- Do not drop, knock, fire or hot open, or mechanically crushing or cutting of a battery, that can result in an explosion.

- Use the device in an extremely high temperature surrounding environment that can result in an explosion or the leakage of flammable liquid or gas; and/or

- Replacement of a battery with an incorrect type that can cause a safeguard (for example, in the case of some lithium battery types).

- Do not drop, knock, fire or hot open, or mechanically crushing or cutting of a battery, that can result in an explosion.

- Use the device in an extremely high temperature surrounding environment that can result in an explosion or the leakage of flammable liquid or gas; and/or

- Replacement of a battery with an incorrect type that can cause a safeguard (for example, in the case of some lithium battery types).

- Do not drop, knock, fire or hot open, or mechanically crushing or cutting of a battery, that can result in an explosion.

- Use the device in an extremely high temperature surrounding environment that can result in an explosion or the leakage of flammable liquid or gas; and/or

- Replacement of a battery with an incorrect type that can cause a safeguard (for example, in the case of some lithium battery types).

- Do not drop, knock, fire or hot open, or mechanically crushing or cutting of a battery, that can result in an explosion.

- Use the device in an extremely high temperature surrounding environment that can result in an explosion or the leakage of flammable liquid or gas; and/or

- Replacement of a battery with an incorrect type that can cause a safeguard (for example, in the case of some lithium battery types).

- Do not drop, knock, fire or hot open, or mechanically crushing or cutting of a battery, that can result in an explosion.

- Use the device in an extremely high temperature surrounding environment that can result in an explosion or the leakage of flammable liquid or gas; and/or

- Replacement of a battery with an incorrect type that can cause a safeguard (for example, in the case of some lithium battery types).

- Do not drop, knock, fire or hot open, or mechanically crushing or cutting of a battery, that can result in an explosion.

- Use the device in an extremely high temperature surrounding environment that can result in an explosion or the leakage of flammable liquid or gas; and/or

- Replacement of a battery with an incorrect type that can cause a safeguard (for example, in the case of some lithium battery types).

- Do not drop, knock, fire or hot open, or mechanically crushing or cutting of a battery, that can result in an explosion.

- Use the device in an extremely high temperature surrounding environment that can result in an explosion or the leakage of flammable liquid or gas; and/or

- Replacement of a battery with an incorrect type that can cause a safeguard (for example, in the case of some lithium battery types).

- Do not drop, knock, fire or hot open, or mechanically crushing or cutting of a battery, that can result in an explosion.
